### DENTIST

Dr. HARVEY D. DUNCAN,  
409-410 Herald Building, Calgary.  
Will be at  
THE HOTEL OLIVER, Crossfield,  
FRIDAY AND SATURDAY  
of Each Week.  
Room 6. Phone 54.

### Local and General

Mr. and Mrs. J. B. McNichol left  
town on Monday to spend a few days  
in Calgary.

Mrs. C. C. Smart journeyed to  
Calgary on Monday, returning on  
Wednesday evening.

Mrs. F. I. Batcheller arrived back  
after a two months' holiday, on  
Sunday evening.

Mr. J. R. Gilchrist is building a  
house at the north end of town, on  
the lot west of Mrs. Burslem, the  
McCaskell Bros. have the contract.

Dr. Dorsey of Innisfail was in  
town on Monday last.

Miss Frazer of "The Victorian  
Order of Nurses," Calgary, was in  
town on Saturday last, the guest of  
Mrs. Willis.

Miss Winifred Phillips of Kil-  
pendy House, Aberlady, Scotland,  
who has been a guest of Mr. and  
Mrs. G. A. G. Dougan of East Circle  
N Ranch has left for the east en  
route for home.

### UNITED CHURCH, CROSSFIELD

Sunday, Sept. 13th, 1925.  
Sunday School, Crossfield 2 p.m.  
Evening Service at 7:30  
W. A. Waldo, Sunday School  
Superintendent.  
Rev. P. C. McCrae B.A. Minister

The Ladies Aid will hold their  
Annual Bazaar in the first week in  
December. The date will be adver-  
tised later.

The Sewing Guild will meet on  
Friday evening at the home of Mrs.  
Jesman, at 8 o'clock. As there is  
a lot of sewing, and fancy work to  
be prepared for the Bazaar a large  
attendance is requested.

A meeting of the Crossfield and  
District Board of Trade will be held  
on Monday evening, Sept. 14th, at  
8:30 p.m., in the Fire Hall.

Business of importance to the  
District will be discussed. Amongst  
other the grading of the road be-  
hind the elevators and main road.  
A large attendance is urgently re-  
quested.

The regular monthly meeting of  
the Women's Institute will meet in  
the Union Church on Saturday,  
Sept. 19th, at 3 o'clock.

Mrs. Reed, of Calgary (a former  
teacher of Crossfield) will address  
the meeting on "Wild Flowers of  
Alberta." Roll call "your favorite  
wild flower."

Did you notice how the Radio  
saved Jiggs this week? It may do  
the same and more for you in mar-  
keting that good crop of wheat.  
We are ready to give you particu-  
lars on the "New Radio," as inter-  
preted by the leading manufactur-  
ers of today.

Radio, Electric Sales and Service.

Archie C. McLEES, Local Manager.

Order from your grocer his best tea and he'll usually send "Red Rose."

# RED ROSE TEA "is good tea"

The same good tea for 30 years. Try it!

## Beware Of Dust

Once upon a time, says the Literary Digest, there was a small boy who was made to beat the family carpets each spring at the annual house-cleaning upheaval. In later years, grown to manhood, he marvelled that he had escaped death from inhaling clouds of germ-laden dust. He thinks that the heat of youthful indignation may have proved germicidal; and he recalls having vowed that there would be no carpets in his home of the future. Nor was the vow forgotten: the home of Dr. Allen Rogers, of Pratt Institute, is carpetless, and the scientist himself is able to note with satisfaction that today a carpeted house is the rare exception. He adds, however, that the change has come about "not because that boy disliked to beat carpets, but because people have come to realize their danger from a tiny standpoint." In an address delivered before a convocation of technicians, under the auspices of the Society of Chemical Industry, as reported in the Weekly Roster and Medical Digest (Philadelphia), Dr. Rogers elaborates the thesis that dust and germs go hand in hand. He tells of consumptive families, where the disease, supposedly "in the blood" was in reality lurking in rug carpets and plush furniture. And in particular he makes indictment of that modern refuge of the disease germ, the upholstered automobile cushion. He presents specimens secured with vacuum cleaner and with naphtha to prove that the fabrics from closed cars rival and outstrip the fabrics from furature, drapery, from closed cars as repositories of dust. Moreover—

"Cultures of the dirt removed from automobile cushions, furniture, and rugs give us positive proof that they are not sterile, as colonias of active germs develop while you wait. Germs are not particular about their lodging-place, and you may rest assured that all kinds have gathered here.

"Of what interest is it to you and me to know that carpets, rugs, furniture and automobile cushions are all of dust and germs? It is simply this: We are living in a progressive and scientific age, we are solving problems of existence, and among the most important is our war against germs. Those of you who are listening may enlist in this army by taking every opportunity to kill the germ. The slogan 'Swat the fly' also applies to germs. If you have carpets in your house, clean with a vacuum or sweep with an antiseptic salt. Put your rugs occasionally in the sun, and give them an antiseptic cleaning. Do not be satisfied with the vacuum or broom, but give them a naphtha sponge bath. Vacuum clean your furniture and rub over the fabric with naphtha or an antiseptic cleaner. Spray your rooms now and then, and in case of a contagious disease always fumigate.

"If your automobile happens to be upholstered in fabric, give it a good cleaning from time to time. Vacuum cleaning followed by a good sponge with naphtha will remove dust and kill germs, but so a stop further and apply an antiseptic wash. If your car is upholstered in leather or leather substitute, a soft rag dampened with naphtha will remove the grease and make it look like new.

"Help those who are fighting the great white plague by doing your bit to kill disease germs, and do this by eliminating dust receptacles. Or, if you cannot eliminate them, see that they are not made into incubators."

## B.C. Paper Mills

Product Is Now Being Sold On An Ever Widening Market  
British Columbia paper is selling on a widening market. It supplies Western Canada and a large part of the Pacific coast; states, 1,000 tons monthly goes to Buenos Aires; several orders were recently sent to Havre, France, which, it is expected, will become a steady market. A market has now been opened at Antwerp. As a result of the new, Canada-Alsitra trade treaty, paper manufacturers are looking for a big demand from that market, which had hitherto been restricted due to a high import duty demanded.

## Many Enjoy Trail Ride

More than 100 persons joined the ride of the Trail Riders of the Rockies on their horseback journey from Banff to Wapta Camp, via Marble Canyon and Lake O'Hara. The ride started on August 8.

## Will Reduce Building Expense

Platform To Do Away With Scaffolding Has Been Patented  
In building operations, a great deal of time and labor is expended in building and moving scaffolds. As a means of reducing this labor and expense, and is enable work to be done at an inaccessible elevation without the building of a scaffold, a vehicular extension support has been patented in America. It consists of a platform on wheels which may be easily raised or lowered. Even when extended to its greatest height, it may be propelled by hand or electric power and steered to any position. Collapsible when not in use, it occupies little space.

## Alberta Dairy Pool

Officials of the new Alberta Provincial dairy pool state that sufficient contracts have been signed up to warrant the establishment of a permanent organization.

## Birth Rate On Decline

Low British Birth Rate For Second Consecutive Year

The number of births in England and Wales in the quarter of the year ended June 30, 1918, equals the lowest birth rate ever recorded in any second quarter of the year except in 1917 and 1919.

The total number of deaths in the second quarter of this year was 113,000, a slight decrease compared with the corresponding period last year.

The infant mortality in the quarter ended June 30 last was 66 per 1,000 births, which equals the lowest rate yet recorded in any second quarter of the year.

## Joint Stiffness Goes,

## Swellings Disappear,

## Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

## NERVINE

It is the great penetrating power of Nervine that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nervine. For the minor aches and pains that arise in every family, Nervine should always be kept handy on the shelf. Use it for Rheumatism, Neuralgia, Neuritis, Colds, 35 cents at all dealers.

## Divers Find City Under Sea

Ruins of an ancient city have been found by divers submerged 30 feet below the surface of the Mediterranean Sea, off the coast of Tunis, according to reports. The divers report many large stone buildings were visible. Archaeologists are preparing to make explorations.

## WHEN THE NERVES

## ARE OUT OF GEAR

## They Need New, Rich Blood to Restore Their Tone

Men and women whose nerves out of gear become irritable, irascible and are blamed for ill-temper, whereas the fault is not theirs, their poor health is the cause. Their poor health comes from worn-out blood, the breadwinner whose anxiety for his family has worried him until he is thin and ill, are the nerves sufferers who become run down. Their nerves, like all bodily organs, need healthy rich blood; worry thins the blood, and their nerves are ill-fed. In such cases a course of Dr. Williams' Pink Pills is necessary, for these pills make new blood and tone up the nervous system. The patient becomes full of energy and happiness for themselves and others return Mrs. Wm. Hughes, Coldwater, Ont., has proved the value of Dr. Williams' Pink Pills, and does not hesitate to say so. She says:— "Two years ago I suffered untold agonies with my nerves. The pains in my head and the back of my neck were unbearable. I was depressed and cranky all the time. All the rest I took and best of medical attention did me no good. My blood and after taking Dr. Williams' Pink Pills and after taking them for a time felt much better. I continued their use with great benefit. My baby was born there were the only tonic that helped me nurse here. I found them a splendid blood enricher, and cannot recommend them too highly. You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

## Will Likely Skirt

## Canadian Shore Line

French Airmen Plan Route For Non-Stop Flight

In the non-stop aeroplane flight from Paris to New York, which Lieutenants Francois Coll and Paul Tarancon plan to attempt, the French airmen will likely pass over the Atlantic coast region of Canada. They will lay their course northward, crossing Cornwall, the southwest extremity of England, and thence proceed over South Ireland and then jump across the Atlantic to Southern Newfoundland. There they will turn and skirt land the Canadian shore line southward to New York.

A hotel in Los Angeles, California, washes all coats before they are returned to the guests in the form of change.

Keep Minar's Liniment in the house

W. N. U. 1593

# Always have Mustard on the table

It's not just custom that makes people take mustard with their meals. Mustard aids digestion and helps to assimilate the food. It is a good habit to acquire. Mix it freshly for every meal.

# but it must be Keen's

## Try These Deserts

### Orange Custard (serves 7)

- 2 cups Borden's St. Charles Milk.
- 1 cup hot water.
- 8 tablespoons cornstarch.
- 3 eggs.
- 1/2 teaspoon salt.
- 1/2 cup cold water.
- 3/4 cup orange juice.
- 2 tablespoons lemon juice.
- Grated rind of one orange.
- 1 cup sugar.

Mix cornstarch, sugar and salt, dilute with cold water, stirring constantly until mixture thickens, afterwards occasionally, about fifteen minutes. Add orange juice and slightly beaten eggs that have previously been mixed; mix thoroughly and finally, add the lemon juice and orange rind. Cool and serve.

### Caramel Custard (serves 6)

- 1 tall can Borden's St. Charles Milk with enough water to make 1 quart.
- 5 eggs.
- 1/2 teaspoon vanilla.
- 1/2 cup sugar.
- 1/2 cup sugar.
- 1/2 cup sugar.

Gradually stir sugar into a hot skillet, shaking the skillet vigorously all the time to prevent burning. The sugar should melt about as fast as it is stirred into the pan. When it turns to an amber color (a light resin color) set on back of stove and add milk, being careful that milk does not bubble over, as it is liable on account of the high temperature of sugar. As soon as the sugar is melted in the milk, add the milk gradually to eggs slightly beaten. Add the salt and flavoring to egg and milk mixture. Bake in custard cups in a moderate oven.

## May Succeed Lord Byng

### Name of Viscount Allenby Has

Associations For Canadians  
Rumor has it that Viscount Allenby may succeed Lord Byng of Vimy in the post of governor-general of Canada. His name has associations for Canadians, for after serving under Lord French with the Old Contemptibles, he was placed in command of the Fifth British Army Corps at the second battle of Ypres, in which the Canadians figured so brilliantly. In the summer of 1917 he was appointed to command the Canadian Corps in Palestine, and curiously enough his name apparently fulfilled an age-old prophecy which says that Allah-nab, a prophet of God, would free Palestine. Another tradition was that "not until the waters of the Nile flowed into Palestine would the Turks leave Jerusalem."

### Minar's Liniment used by physicians

Robbing Peter to Pay Paul  
While on the one hand we cannot, especially in view of our enormous annual payments to America, do without the reparations which Germany owes us, we are to a large extent paying them out of our own pocket so long as they are here in the form of goods, which deprive our own people of work London Referee.

## Came Long Distance To Re-union

New Zealander, 82 Years Old Visits Kitchener, Ont.

Perhaps the oldest man at the reunion in Kitchener, Ont., and the one who came the longest distance to take part in the celebrations was Matthew Weber. Six months ago, while listening in on the radio, at Otaki, New Zealand, where he lives, Mr. Weber heard the news of the Kitchener Old Boys' Re-union broadcast. He made up his mind that since he had not been in the city in 62 years he would take advantage of the re-union to go back and meet his old friends. Mr. Weber is 82 years old and in excellent health with the exception of deafness. Mr. Weber was born at Chippewa 82 years ago. He left 62 years ago, finally settling in New Zealand.

Many infants are infested by worms which cause great suffering, and it is not promptly dealt with may cause constitutional weakness difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

## Honor To Shoemaker

William Sturgeon, a shoemaker living in England many years ago, gets the credit for the present successful operation of dynamo, motors, and transformers. Sturgeon invented the electromagnet, which in some form or other is used in the manufacture of most present-day electrical power machines.

Choked For Air—Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The soothing, soothing smoke or vapor penetrates, clears the passages and gives instant relief. It has been the years of success. It is the sure remedy for every sufferer.

## Slaughter Painless

A new weapon to slaughter cattle painlessly has been invented by Mrs. Simons, of Paris, founder of the League for the Protection of Animals. A dart from a gun is shot into the brain and death is said to be instantaneous and painless.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

What is said to be the world's deepest gas well has just been completed in Pennsylvania. The engineers had to go down 7,425 feet, and gas is flowing at the rate of half a million cubic feet a day.

# CHILDREN CRY FOR

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of Dr. J. C. H. Peckham. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Proved safe by millions and prescribed by physicians for Headache Neuralgia Colds Lumbago Pain Toothache Neuritis Rheumatism

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 10 tablets and 100 tablets—Druggists. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoclonal-acetic acid of Salicylic acid (Acetyl Salicylic acid) and is the only genuine Bayer Aspirin. The Bayer Aspirin name will be stamped with their general trade mark, the "Bayer Cross".

Wanted.—Good Second-hand Cook Stove. Must be in good condition.  
F. Purvis, Crossfield.

For Sale.—Threshers' One Water Tank in good shape. Price \$20. Apply T. Tredaway. Phone 112

Wanted.—To lease half-section or section of farming Land. James Millar, Box 62, Crossfield.  
Phone 1210

Strays.—Two Horses, one brown mare 8 years old, and one Buckskin Saddle Mare, about 10 years old. Been missing since May 10th. Anyone returning or giving information as to the whereabouts of same will be suitably rewarded.  
I. H. Benoit, P.O. Box 76, Crossfield.

#### Council Meetings

The council of the Village of Crossfield will meet in the Office of the Secretary-Treasurer on the first Monday of each month, commencing with February at the hour of 8:30 o'clock p.m.  
By Order of the Village Council.  
W. McRory, Sec.-Treas.

Crossfield School District No. 752  
The MONTHLY MEETINGS of the above School Board will be held in the Drug Store, Crossfield, at 8 p.m., on the second Monday of each month.

Ratepayers are invited to be present at these meetings.

All matters of business pertaining to this district will be attended to at this meeting.

The office of the Sec.-Treas. is in the Crossfield Drug Store.

A. W. GORDON, Chairman.  
Merrick Thomas, Sec.-Treas.

WANTED:—All Ladies of Crossfield and District to patronize the Beauty Parlor, in Hotel Oliver, on Thursday of each week. For your appointment phone 49, Crossfield.

ESTRAYS.—Please notify E. P. Wygle, P.O. Box 89, or phone 1215, Crossfield, of any stray cattle with brand OR on right hip.

#### WEEKLY NEWS BULLETIN

##### Peace River Rates Reduced

Reduction of rates on grain for export from points on the E.D. & B.C. line to the Peace River have been announced by the officers of the C.P.R., which is operating the road. The new rates apply to shipments eastward west bound both, and will mean a considerable saving to farmers of the Peace River country. The reduction will be around an average of 6 cents per bushel, and there will also be reductions in cost of shipping livestock. Passenger rates are also to be reduced. These reductions will also come into effect September 10th.

##### Agricultural Editors Entertained

The party of 70 American agricultural editors and ladies touring Western Canada were entertained at Edmonton this week under the auspices of the Provincial Government, City of Edmonton, and The Edmonton Board of Trade. Owing to wet weather the party did not make the auto tour of the district as planned but were taken in their special train to Fort Saskatchewan during the day where the people of the town served luncheon and a visit was paid to the farm of Lord Rodney nearby. A visit was also paid to the university farm at Edmonton, and in the evening the Province and City tendered the guests a banquet and a dance.

##### Convention for Alberta

The Rotary District Conference for western Canada district will be held next year at Banff, Alberta, according to the decision of the Conference at Kenora the past week.

##### Eighteen Years of Service

After eighteen years of service as a justice of the peace and police magistrate, E. N. Barker, of Lethbridge, has retired, and the Provincial Government has named W. A. Hamilton of Lethbridge, as his successor.

##### Civil Servants Meet

The Convention of the Amalgamated Civil Servants of Canada was held in Edmonton during the past week with a good attendance of delegates.

##### Will Stay in Alberta

It is announced that Hon. Francis Eaton of Alix, Alberta, recently succeeded to the title of Lord Chylesmere, will not go to England to take his position as bearer of that title, but will remain in Alberta where he has been engaged in farming for some years.

##### Good Yield of Wheat

It is announced that threshing returns on the Provincial Jail Farm at Lethbridge have shown a yield of winter wheat of 33 acres of 50.5 bushels an acre on irrigated land. An experimental plot of Garnet wheat gave 40 bushels to the acre.

##### Rival Restaurants

Sol and Abe had always been rivals, first one, then the other, outdoing the other in the restaurant business. When they had resorted to every means of vying with one another, and seemed to be running along at a dead-heat Sol took a plunge and leased a building directly across the street from his rival. He repainted its front and hung out a flaming sign bearing the name of the new establishment. It was "Grand Cafe of the Two Hemispheres."

Abe was distraught when he saw the custom that surged into the new restaurant, and vowing not to be outdone, had his place repainted and hung out an even more ostentatious sign. It read: "Grand Cafe of the Three Hemispheres."

#### Reduce Grain Rates to Coast

Reductions in grain rates from Alberta to the Pacific coast which will mean hundreds of thousands of dollars in saving to the farmers of the province, have come about as a result of an order by the Board of Railway Commissioners equalizing grain rates west bound with those east bound.

A. Chard, Freight Traffic Supervisor of the Provincial Government, issued the following statement on the order:

"The announcement from Ottawa that the Railway Board has equalized the grain rates west-bound with those east-bound sounds the death knell to all opposition to the western route. September 2nd, 1925, will go down in history as a red letter-day for the Province of Alberta as well as for the Pacific ports, for as water will run down hill, so will traffic follow the lines of least resistance. The equalized rate on the shorter rail haul will inevitably produce a smaller through cost, consequently Alberta's wheat will export via Pacific ports. Now that the permit system which prevented direct individual shipments being made to Vancouver has been withdrawn, with the prospect of wheat being sold on the Vancouver basis instead of Fort William, the producer is in the position where he can be assured of the advantage of the increased price accruing to him. The specific reductions on mileage basis will make the new rate 18 cts. from Calgary and 20 cts. from Edmonton to Vancouver, as compared with the old rate of 22½ cts. from both points. The reduction from a point 800 miles distance will be 4½ cts. per 100 lbs. Tofield is 807 miles from Vancouver; taking 800 miles as an average haul, the reduction in cost will be 2.7-10 cts. per bushel of wheat.

"In 1923 fifty-two million bushels passed through this elevator in Vancouver. With the storage capacity now over four times as great at that point, and a new elevator being constructed at Prince Rupert and no derth of shipping space, Alberta will experience no inconvenience in sending all her wheat westward this year. If fifty million bushels go this route at a saving of an average of 2 cents per bushel, one million dollars more will remain in the pockets of the Alberta farmers.

"While the specific application on which this judgment was rendered was launched by the Province of British Columbia, it was only a follow-up to the Railway Commission after an appeal to the Privy Council by the Province of Alberta and British Columbia in 1923 against the decision rendered by the Board in British Columbia's application for removal of the mountain differential." After the hearing by the Privy Council, the Board ordered a 10 per cent reduction on the west-bound grain rates, which came into effect in October, 1923. The application was then launched by British Columbia and was heard at Vancouver in November, 1924. The Government of Alberta was represented by counsel and its Traffic Officer at the hearing and gave full support to the application from the producers' viewpoint.

"It is noted that the Order is signed by the Chief Commissioner and Commissioner Oliver, three other Commissioners dissenting, but the Chief Commissioner says the Order stands and the rates will come into effect September 15th, which will cover the most of this year's crop."

No Best Seller.—Why, my dear man, already my poetry is being read by twice as many people as before.

Oh—I didn't know you had married.

## NORTH COUNTRY RAILWAY NEEDS TO BE CONSIDERED

Calgary.—There is a large productive territory in north country, which includes not only the Peace River district proper but the district north of the Peace, whose traffic possibilities we cannot and will not ignore," said Sir Henry Thornton, president of the Canadian National Railways, in replying to a question regarding the Edmonton, Dunvegan and British Columbia Railway.

In connection with the negotiations now pending for the running of the line either by the Canadian Pacific or the Canadian National, Sir Henry stated another conference was to be called by the premier.

Asked what foundation there was for the persistent rumors to the east that there is a possibility of the Canadian Pacific and the Government lines fusing, Sir Henry remarked this had been talked about, but there was nothing yet of a tangible character.

It is a very large and many-sided question and it should be viewed solely with respect to the welfare of the Dominion as a whole, he said.

He added that personally he was not in a position to express any opinion at all.

"The latest information is that you will remain in Canada," it was suggested.

"There has been no discussion at all with respect to the continuance of my work here," said the president, "and it is naturally a matter that is in the hands of the proper persons."

Asked who the latter were, Sir Henry said he supposed that in the last analysis they were the people of Canada.

## Leaves Cares Of Office

Officialdom of Britain Off on Autumn Holiday

London.—If a rival power should open war on England tomorrow, the measures of defence would have to be organized by underlings. The British Government has gone grouse shooting, motoring and general holidaying.

King George and Queen Mary are visiting Princess Mary at Goldborough. Baldwin has left for his country, Hugh Hall, Yorkshire. Prime Minister Churchill has gone to Surrey, where he is painting pictures. Lord Birkenhead is shooting in Scotland, where are also Admiral Lord Beatty, Field Marshal Earl Haig and other chiefs of the fighting services. The home secretary, Sir William Jonsson Hicks, is giving the Communists a rest for a while while he shoots grouse, and the war minister has gone to the seaside to recuperate.

Most of the chiefs of the permanent staffs of the government offices are also taking holidays in the last half of August and most of September.

## To Check Rum Running

Conference Between Officials of Dominion and U.S. Government  
Washington.—Canadian representatives to attend the conference between officials of the Dominion and United States Governments to draw up regulations to give effect to the recent treaty to suppress smuggling across the border, arrived here today.

The chief purpose so far as the United States is concerned, is to tighten the border restrictions against rum smuggling and narcotic smuggling, and for this reason Assistant Secretary of the Treasury Andrews, new head of the prohibition enforcement, will be prominent in making the regulations.

### Wage Board To Meet

Saskatoon.—A meeting of the Saskatchewan fair wage board will be held in Regina in September, at a date not yet decided. John A. Mather, chairman of the board, announces Mr. Mather had not yet received any notice of business of unusual moment. He expected that routine matters would largely occupy the attention of the board.

A day of fog in London is estimated to have cost the country council tramways \$4,000.

W. N. U. 1291

## Ready To Argue Claims

British Columbia Has Completed New Case in Freight Rates

Victoria, B.C.—British Columbia has completed preparation of its new freight rates case, based on recent parliamentary legislation, it was announced by Premier John Oliver, after G. G. McEwen, government counsel, had telegraphed to the railway board, urging an immediate ruling or an immediate argument on this province's claims for lower western grain rates.

"We are ready now to argue our claims any time," Mr. Oliver stated. "On account of the rate legislation passed by parliament at its recent session, we will hold the railway board actually has no alternative but to give us the same rates on westbound grain as those prevailing on eastbound grain." We assert we are entitled to the same freight rates and want them to apply on the movement of this year's crop.

Edmonton.—A saving of about five cents per bushel to Peace River farmers and shippers will be effected if the railway commission gives an order making the Crow's Nest freight rates on grain applicable to the E. D. and B. C. and Central Canada Railways. Request to the board for such an order has been made by A. Chard, government freight supervisor, and it is expected the reduced scale will be effective in time for the movement of this season's crop.

## Worried Over Polish German Trade War

Danzig Business Men Do Not Profit By Exemptions

Danzig.—The trades war between Poland and Germany now in progress may have one beneficial result in the opinion of many Danzig business men. It will mean the defection of Upper Silesian coal to the countries bordering upon the Baltic Sea which were formerly a part of the Russian Empire. Such a defection would, in their opinion, prove an advantage to four interested groups; the Poles would have a promising new market in exchange for the German; Danzig would gain much new business as the shipping port; the Baltic countries could obtain the coal more cheaply than they can now buy English coal; Germany could dispose of her Ruhr coal without the interference of Upper Silesian coal competition.

The people of Danzig are the innocent victims of another phase of the rate war between Germany and Poland. Goods of purely Danzig origin may go to Germany unmolested and in return—foodstuffs and other articles intended purely for Danzig are permitted to come into the Free City exempt.

As a matter of fact there are practically no "goods of purely Danzig origin," consequently exempting that class of merchandise affords little comfort to the Danzig business man.

### Miners Accept Terms

London.—A conference of delegates of the Miners' Federation decided to accept the terms of the truce in the coal industry on which the mine owners' notices for the termination of the 1924-25 wage scale were withdrawn, thus averting the recent threat of a strike. The conference instructed the executive of the federation to take such steps as might be necessary to present the miners' case before the proposed government commission of inquiry.

### Palmer Cabinet Doomed

Paris.—Premier Palme's compromise cabinet was doomed when the Socialist Congress, representing 104 direct votes in the Chamber of Deputies, decided overwhelmingly against giving any support to the present cabinet.

The resolutions of Leon Blum and Paul Faure, declaring war on Palme, were carried by 210 votes against 559, for a motion urging a benevolent attitude toward the present government.

### Low Water In Lake Ontario

Rochester, N.Y.—Concern has been caused here by the fact that Lake Ontario is smaller and shallower than it has been in the last quarter century. Government experts here declare that the Chicago drainage canal, completed last year, which diverts water from Lake Michigan through the city of Chicago and into the Mississippi Valley for sanitary purposes, is responsible.

## FUNDING OF THE BELGIAN DEBT TO UNITED STATES

Brussels, Belgium.—Great reserve is shown by the Belgian press in commenting on the news from Washington of the agreement reached there for funding the Belgian debt to the United States.

Vingtieme Sicle emphasizes the conditional character of the proposed arrangement and reveals the manner in which the American Senate refused to honor the signature of President Wilson to the peace treaty.

The paper questions whether Belgium is to be congratulated on the terms reached at Washington, even if the conditions as outlined in the dispatches received here are confirmed.

London.—Official circles here were silent today regarding the settlement reached in Washington for funding Belgium's debt to the United States.

The impression was given, however, that the favorable nature of the terms was to be expected, and that unless a study revealed new angles at present unthought of, the British Government would not depart from its previous policy of refraining from pressing Belgium in connection with her financial obligations to this country.

## Criticizes Canada's Navy

Sarcastic Article Appears in Weekly Paper in London

London.—A writer in Truth, the weekly paper which frequently comments upon the paucity of Canada's contribution to the British navy, says: "As The Toronto Globe recently was very much displeased with me for quoting the precise figures of the Dominion's contribution to the sea power of the empire, I think it right to tell the world that one-half of the active Canadian navy has now put to sea to cruise in company with the Capetown of the North American squadron. In other words, the destroyer Patrician has left her moorings at Esquimaux and will not return until the beginning of October."

"What the other half of the active Canadian navy is doing I have no information at the present moment, but I believe she is assuring the safety of Halifax."

## Lost Their One Laundryman

Hawaiian Citizens Greatly Resented Arrest of Only Chinaman

Honolulu.—The laundry business in Honolulu, Island of Maui, Hawaii Territory, has been paralyzed, and is calling a protest meeting, all on citizens, deprived of clean shirts, collars, etc., have been on the verge of count of the Harrison narcotic law. Such was the story told by J. A. Manning, federal narcotic chief for Hawaii, on his return from Maui, where he arrested, among others, the town's only laundryman, Chow Wing.

"One hotel had no linen, and every one in the village seemed to have a dress or a shirt in the hands of Wing Chow," Manning said. "To hear the grief and protests, you would have thought the patron saint of the town had just expired."

## England Plans

### New Air Service

Passengers Would Be Landed At Airport On Thames

London.—A new development in air service between the continent and London is being planned for the near future. Experiments are being carried out with a view to the establishment of an airport on the River Thames at Hammersmith, just below Putney. "More French amphibious planes will alight and set down passengers on a specially constructed landing stage. The authorities stipulate that such landings shall occur before nine o'clock in the morning so the dislocation of river traffic may be avoided."

Curtails Exploration For This Year

Washington.—The "McMillan Arctic expedition has abandoned hope of carrying out its full exploration programme over the Polar Sea this year. Curtailment of the expedition's activities was forced by adverse weather, which has blocked the steamer in ice, far west ahead of the usual winter season.

## Return Russian Warships

French Government Decides to Hand Ships Over to Soviets

Paris.—The French Government has decided to hand over the Russian warships now at Biseria to the Soviets. The Soviets in an agreement drawn up by Ambassador Kravsin and Deputy Vincent Danilov, the French delegate, recognize the Czarist debt of \$1,800,000,000 and give French capitalists a contract to reconstruct Russia in return for huge French credits.

The Soviets promise every one of the four million French Russian bondholders ten per cent. of his holdings in new Soviet bonds and ninety per cent. in bonds of new Franco-Russian companies which will be formed to exploit mines, forests, factories and oil fields in Russia. However, it is understood that the whole debt has been reduced from gold to paper francs.

The Russian fleet at Biseria, formerly held by General Wrangel who was defeated by the Soviets in the Crimea, consists of two dreadnaughts, two battle cruisers, nine destroyers, four submarines, one school ship and some auxiliaries.

## Predicts War Between States and Japan

British Author Says Conflict Will Start March 3, 1931

London.—Japan will declare war on America on March 3, 1931, by completely blocking the Panama Canal. Japan will then capture the Philippine archipelago after wiping out the American Asiatic fleet. A mighty Japanese fleet launched from ships will proceed to bomb and destroy San Francisco, Oakland, and Los Angeles.

After a tremendous loss of life, money and territory, the American fleet will win the war by annihilating the Japanese grand fleet in mid-Pacific in one of the greatest battles in naval history.

This prediction of conflict between America and Japan is made in a book, entitled "The Great Pacific War," by Horatio Bywater, noted naval architect and strategist. The book, just published here, is causing keen interest in military and naval circles.

## Explorers Ordered To Leave Mongolia

Government Alleges Leader of Expedition Has Violated Agreement

Urga, Mongolia.—The Mongolian Government has ordered the third Asiatic expedition of the American Museum of Natural History, under the leadership of Roy Macgregor, to cease its exploration and scientific work and to leave Mongolian territory, alleging that Mr. Andrews has violated the terms of his agreement with Mongolian scientific organizations.

The Mongolian government further alleges that besides carrying out his scientific work in the domains of paleontology, geology and zoology, Mr. Andrews' expedition has also engaged in topographical work and has employed a number of suspicious persons in a military sense—persons.

Mr. Andrews also is accused of carrying on political propaganda and stirring up the Mongolians against the Red Bolsheviks.

## Shipping Flowers To England

Canadian Blooms Are a Surprise to English People

Ottawa, Ont.—Reports indicate that thousands of cut flower blooms are now being shipped to England from Canada. From Montreal a landscape gardener has sent over 3,000 spray blooms, gladioli with a riot of colors, to England to grace the offices of the C.N.R. and C.P.R. at Wembley. It is customary for flowers shipped from Canada to England to be kept in cold storage, arriving with the freshness of the Maple Leaf's fertility. English people are noted for their fondness of flowers, but the Canadian blooms have been a surprise. The Canadian people have been surprised to have a far more flourishing bloom than the peony grown in the Old Country.

### Chicago Editor Dead

Chicago.—Victor F. Lawson, editor and publisher of the Chicago Daily News, is dead. Mr. Lawson had suffered heart attacks in recent years from overwork, and an attack with acute dilated, proved fatal.

## PROPOSE UNITING VETERANS IN ONE ORGANIZATION

Toronto.—As the result of a province-wide conference of war veterans here, the veterans of Ontario achieved the most important forward step yet made in the direction of uniting all ex-service men under the banner of one great Canadian organization.

The gathering, made up of 159 accredited delegates from all parts of Ontario, met under the title of the Ontario Veterans' Unity Conference. The outstanding business achieved was the unanimous carrying of a resolution favoring Dominion-wide unity of veterans; the appointment of a committee of seventeen representative veterans to represent all Ontario veterans at a Dominion-wide unity convention of war veterans to be held at Ottawa not later than October 31, and the selection by the Ontario veterans of the name Canadian Legion of Veterans as the name of the new body in which all war veterans will join forces.

## Saskatchewan Lignite

Briquetting of Saskatchewan Lignite Technically Successful

Regina, Sask.—Carbonizing and briquetting tests on Saskatchewan lignite, which have recently been carried out in Germany, have proven technically successful, said W. C. Worrester, professor of ceramics engineering at the University of Saskatchewan, who was in charge of the tests and reported to the government upon his return to the city.

The tests have been carried out during the past two summers at two of the largest briquetting plants in Germany. These were Thyssen & Company, at Hülheim-Ruhr and the Lurgi Company at Frankfurt. Fifty-two tons of lignite from the mines of the Western Dominion collieries at Tylorburn were used in the tests.

## Wheat Board Surplus

Saskatchewan's Share To Be Paid At Once

Ottawa.—Confirmation of the arrangement for the immediate payment of Saskatchewan's share of the wheat board surplus was made here by Hon. J. A. Robb, acting minister of finance. The sum in question, totalling approximately \$258,000, was forwarded to the Saskatchewan Government in the course of the next two or three days; and represents, it is understood, the proportion of the surplus due to that province, of those who had sent wheat to the board for sale and distribution at the time the Canada wheat board gave up office in 1921. Payments of the respective shares due to Alberta, Ontario and Quebec have already been made, it is stated.

## Tourist Traffic Heavy

Over Two Hundred Cars Go Into Banff Daily

Edmonton.—Two hundred and twenty motor cars per day have been going into Banff this summer. The provincial highways branch has a statement from the superintendent of the Rocky Mountain Park showing that from June 1 to August 7 the traffic dues were collected at the east entrance to the park on the Calgary-Banff highway from 8,500 cars west-bound and 6,800 east-bound. This is a total of 15,300 for thirty-nine days, and the average is still keeping up.

### New Grain Inspector

Calgary.—George Hills, Dominion Government grain inspector in Calgary, has been offered and accepted the appointment of chairman of the grain appeal board authorized by the board of grain commissioners under the new Grain Act.

Mr. Hill will commence his new duties on September 1. He will be located in Calgary.

### May Adopt Blue Sky Laws

Victoria, B.C.—If the inter-provincial conference in Winnipeg this week succeeds in clarifying federal and provincial jurisdiction, the Government of British Columbia will consider the advisability of putting new "blue sky" legislation on its books to protect investors from unscrupulous promoters, Attorney-General A. M. Manson announced today.

## Another Century Will See Pacific Coast Importing All Of Its Lumber From Europe

One hundred years from now the people of the Pacific coast regions of North America will be importing lumber from Europe. So stated a recent forestry expert from Norway after an extensive journey through the lumbered country of Oregon, Washington and British Columbia.

In view of the thousands of miles of stately standing timber on the Pacific coast today from California to Alaska, the foreign expert's words seem too ridiculous to even merit consideration. For here, upon a rugged coast-line, and reaching far into the interior, is such an abundance of tree growth, close-standing and mighty, as to seem inexhaustible. No land for miles on earth has been so richly endowed by nature with such species as the fir, hemlock, spruce and cedar, as the Pacific coast.

Yet, despite this far-reaching, still standing army of timber, immensely tall and thick of butt, so vast and ever-increasing is the destruction caused by the logging industry that already there are a few far-etched men nearly in agreement with the prophecy of the foreign authority. "Abundance, luxury, decline, desolation!" Those words of Daniel Webster rise up to sound a warning to the too optimistic people of a new land.

A tree which took thousands of years to grow can be felled and cut up into saw-log lengths in half a day of the logging industry, when horses and oxen were used to draw out the felled timber, no harm was done to the surrounding stand. Today, "high-head" logging is coming more and more into use. By this system the enormous logs are lifted by donkey-engine power, and steel cables run to two inches thick, and carried down the air. And the dangling, moving logs, many tons in weight, smash down all growth before them. Seedling and sapling are crushed to earth. Trees fifty years in the growing and broken like matches. When a modern lumbering outfit finishes work, the ground is a desert. Trees that would produce lumber in another half-century are turned into waiting fodder for the "demons." Fortune in a pole, the sap and pulp timber have been wasted. Not a seed tree even is left.

With these things in mind, the prophecy that "The Pacific coast areas will be importing lumber from Europe in a hundred years," seems less of a far-fetched statement.

### How English Dry Wet Hay

Farmers Enthusiastic Over Process That Works Successfully

In England, where the weather is frequently that it is no easy matter for the farmer to "make hay while the sun shines," they have hit upon a plan that makes it possible to cut grass and stack it in the midst of rain without injury to the hay. Of course the wet grass cannot be put directly into the barn, which is what most American farmers do with hay properly sun-dried. The British farmer puts up a frame made of stout poles connected by wire, and from the base of the frame he runs a pipe out to the drying machine. The newly mown hay is stacked up about the frame in a circular shape. He then thatches it lightly and starts his machine, which drives hot air through the pipe to the bottom of the stack. The heated air rises through the grass, and in a day of eight hours no less than twelve tons of hay can be thoroughly dried. Enthusiasts over this contrivance say that hay thus dried retains more of its nutritive value than sun-dried hay. The drying machine can be driven by any machine engine, that is, a light tractor will serve. The engine operates a fan that drives into the pipe air that has been heated by passing over cylinders that are kept hot by kerosene burners.

### Calgary's Population

Calgary's population in 1925, estimated by the Henderson's directory, following a careful survey of the city, has been placed at 77,930, according to the 1925 issue which has just been published. Last year this same authority estimated the population at 75,835, showing an increase of approximately 1,895.

W. N. O. 1931

### Dehydration Best Method

Extensive Experiments Have Proved Process is a Success

Dehydration is the drying of fruits and vegetables by artificially produced heat under carefully controlled conditions of temperature, humidity and air flow. That the process is a success has been proven by extensive experiments carried on at Ottawa, superior products being produced and the freshness and flavor better maintained than by any other method. In an address before the Pomological Society of Quebec, Miss E. W. Hamilton, scanning secretary of the Dominion department of agriculture, gave the following as the advantages claimed for dehydration: That fruits when cooked more nearly resemble the natural in flavor and color than when treated by evaporation; that the results are protected from dust and bacteria; that the market is saved from a superabundance of ripe fruit; that the product requires less space, is of much less weight than if fresh, can be shipped in tin or other containers, and that dehydration makes possible the combination of drying, packing and all the steps in the process under the one roof. Miss Hamilton thought dehydrators proved that dehydration would eventually take its rightful place as a valuable by-product branch of the fruit industry, if not a worthwhile industry of itself.

### Interesting To Sheep Raisers

Revision of Ram Premium of Dominion Livestock Branch Ready for Distribution

Farmers who keep sheep will be interested in the ram premium policy of the Dominion livestock branch. This policy has been recently revised and a pamphlet containing the rules and regulations up-to-date may be obtained from the sheep division, livestock branch, department of agriculture, Ottawa. According to the new regulations ten or more farmers in a district, each keeping ten or more breeding ewes, and none of whom has previously kept a pure-bred ram, must agree to purchase pure-bred rams of the same breed. Two farmers each of whom keeps less than ten ewes, may combine their flock as unit under the plan. Certain regulations, detailed in the pamphlet, such as dipping of flocks, docking of lambs, must be complied with. When this is done two annual payments of five dollars each will be paid by the livestock branch for each ram used, which will go a long way in making up the difference between the cost of a scrub ram and that of a good pure-bred ram. The increased value in wool and lambs easily makes up the balance.

### To Have Coast Office

Alberta Wheat Pool Plans to Export Most of Its Grain From Vancouver. Offices are to be maintained in Vancouver by the Alberta wheat pool. Since the pool contemplates exporting most of its grain through Vancouver there will be a tremendous amount of office routine to be carried out in connection with the pool's dealings with the terminal elevators, the railway companies and especially the shipping companies which convey the grain to the markets of the world.

It is understood that premises have already been selected, and the personnel is on the way to take charge. The pool charterers its own cargo space and will have to maintain a fairly large staff to handle the various details of its activities in this port.

### Buffalo Remain In New Reserve

Flat denial that any buffalo transported from Wainwright to the Woodhouse reserve at La Bette, on the Slave River, are leaving away to the south back to their old home at Wainwright, or that they are over likely to, was made by D. H. Christie, of the North West Territories and Yukon branch of the department of the interior, who supervised the whole movement of the 1,364 plains animals to northern regions recently.

Women are naturally foolish because they were made to match the men.

### Advices Canada To Get Boy Immigrants

200,000 Desirable Settlers Leave British Schools Yearly Says J. Obed Smith

In a recent interview, Colonel J. Obed Smith, former Canadian government official in London, stressed the importance of British boy immigration. This, Col. Smith said, had been realized by Australia but not appreciated in Canada. "In fact," said he, "Canada has lagged behind." "Not less than 200,000 boys leave British schools every year, crowding the London market. These should form a new immigration field each year from which Canada could draw very many desirable settlers. Australia has proved the value of the young British generation to the full, but Canada has not done so. People inquire in public if Canada really wants immigrants, especially when the Empire Settlement Act of the Imperial Parliament provides financial assistance to an extent that has hardly a limit within the possibilities of use. No one can complain that the British people are not willing to assist their own to settle in fact," Col. Smith emphasized the fact that, if the scheme was to prove successful, the boys would have to be placed with good farmers, receive fair wages and the government would have to see that a portion of such wage was placed in the provincial savings bank, so that by the time the boy reached mature years he should have sufficient money to make a start on a farm of his own.

### Big Game Being Massacred

Police Force Unable To Prevent Carnage In Transvaal

Sportsmen returning from the northern part of the Transvaal speak of the reckless slaughter of big game by hunters who seek supplies of fells (sun dried meat). This wanton slaughter followed a recent proclamation allowing the shooting of the Wildbeest or Gnu, a South African antelope having a buffalo-like head, an ass-like mane and horse-like tail. Apparently all sorts of big game are being turned into blitong and the wagons return from the hunting grounds with full loads of game. The open country is described as unsafe. Game are being fired all day long, and there are casualties in consequence. Meanwhile game is being absolutely massacred. Many animals are merely wounded and are left to die in agony. The police force is not large enough to prevent the carnage.

### Business Is Improving

Employment at the beginning of July showed a further increase in Canada of 2.3 per cent. This gain caused the index number to stand at 96.5 as compared with 94.5 in June last and with 95.9 on July 1st, 1924. With the exception of logging, in which there was a seasonal decline, and trade, which showed no general change, all industries registered increased activity on the whole, according to the Dominion bureau of statistics.

### English Hounds For Ontario Hunting Grounds

This consignment of twenty-one Foxhounds from the famous Mendip Hunt Club, at Friday, Somerset, was brought to Canada in July by the Dominion Express Company for the Toronto Hunt Club. Commodious quarters were especially erected on the "Montrose" for the long ocean voyage and Huntmaster Morris, from the Toronto Hunt Club, who brought the animals across, stated that they suffered no ill-effects from the trip. This is the third batch of foxhounds brought to this country by the Dominion Express within recent weeks.

## Pioneers Continue To Come From Many Nations To Take Up Homesteads On Prairies

### Line In Feed

Feed and Drink Must Supply the Necessary Lime Compounds

One of the most important of the mineral constituents which enter into the tissue of the animal body is lime (calcium), says Dr. Shutt, Dominion chemist. Small traces of calcium compounds occur in muscle and the blood, bones and teeth are essentially phosphate and carbonate of lime. Cows need it in their pregnant state in order to supply their own needs and to build a strong skeletal structure in the developing calf. Special attention should be given to the phosphate of lime supply for swine because of their two liters a year, their rapid growth and the general nature of their feed which too frequently is poor in lime compounds. The production of eggs and milk, Dr. Shutt points out, make large demands on the phosphate of lime content of the ration. Feed and drink must supply the necessary lime compounds. Hard water, no doubt, is one of the principal sources. Among the forages the legumes are particularly rich in lime, alfalfa heading the list, the feeding of which or other leguminous hay fodders practically obviates the necessity of supplementing the ration with special mineral-containing feeds. Meat and bone meal, bone meal, tankage and certain other packing-house by-products are rich in desirable mineral constituents. In summer the probability is the animals while foraging especially in clover, will provide themselves with a sufficiency of calcium, but in winter the feeds containing a large proportion of the milling by-products of wheat, oats, corn, etc., may require supplementing with calcium rich feeds, unless good clover or alfalfa hay can be liberally fed.

### Saskatchewan Butter Production

Increases 27.9 Per Cent, Or 636,591 Pounds in July

Saskatchewan's production of creamery butter in July jumped another 27.9 per cent, or 636,591 pounds, when the production for the month was 2,925,281 pounds, against 2,288,700 pounds in the corresponding month a year ago.

Production for the first seven months of this year totals 9,305,322 pounds, as compared with 7,255,577 pounds in the same period last year, or an increase of 1,909,745 pounds, 25.8 per cent. The central portion of the province is still making the proportionately greater increase in production month by month.

### "B." To Be Very Rare

Twenty-five years from now tuberculosis will be as uncommon as leprosy is today, says Dr. C. A. Saleeby, of the London Medical Institute.

Pioneering days are over, adequate transportation, good roads, nearby markets, etc., having done away with the necessity of "howling a trail for the wilderness" and blazing a trail for others to follow, says the modern sage, but an incident happened recently in the Edmonton, Alberta, land office not only disproves this fallacy but clearly illustrates that pioneering is still an attraction for many. The other day there walked into the Edmonton land office a man, about 43 years of age, strong, upstanding and bronzed by an out-of-doors life, who made known his desire to tackle farming once again and took out papers on a second homestead in the Last Great West—the Peace River country. Applications on homesteads in the west are being accepted daily by the Federal government, and the statement that a man filed on a second homestead would not appear unusual were it not for the fact that only those who filed on the last prior to June 2, 1889, are entitled to second entry.

When this farming pioneer came to Canada in 1884, a lad of 18 years of age, from a little farm in Cornwall, England, and settled on a homestead fifty miles from the nearest settlement—Portage la Prairie, Manitoba—and before the Canadian Pacific Railway had commenced operations in the west, he had had to put up with all the hardships incidental to pioneer life. With the characteristic perseverance of the early settler, he cleared, heeded and heeded his land. The coming of the railway and settlement of the adjoining lands brought many improvements, both in farming and living conditions. His labors became less arduous and he raised his family in comfort to the present day.

A few years ago he sold his Manitoba farm, intending to retire to a well-earned rest. However, when his sons took up homesteads in the Peace River country, he was unable to repress his pioneering spirit, so he once again filed on free land, not only to be near his sons, but also to help develop and settle the country which first gave him a start towards success. This is the somewhat brief but significant story of one Englishman who came to Canada looking for a home and independence. His record of achievement in the west had been emulated by numerous fellow-countrymen, as well as by natives of many other countries. At the last census of homesteaded entries, it was found that, in addition to native-born Canadians, over 34 different nationalities had taken up homesteads in the prairie provinces. Some of these pioneers came from such far lands as Iceland, China, Japan, Persia, Greece, India, Palestine and Mexico. There seems to be no limit from which Western Canada draws her settlers.

Within recent years the area available for homesteads have become more and more restricted. At January 1, 1925, the Federal Government estimated that of the area surveyed in Manitoba, Saskatchewan and Alberta, nearly 55,000,000 acres were devoted to homesteads. The scarcity of free lands in close proximity to the railways, however, does not seem to be any drawback to the homesteader—3,754 entries were made in 1923—and the enhanced attractions of the fertile open prairie assure, for some time to come, a steady stream of that most valued class of settler—the pioneer.

### Procuring Caribou For Museum

New York Man Goes To B.C. For Special Specimens

Proceeding to the Casuar country of British Columbia for the purpose of getting special specimens of the Caribou caribou for the American Museum of Natural History, New York, Mr. and Mrs. James Lipplitt Clark have sailed from Vancouver.

They intend going to Wrangell and from there to Telegraph Creek, head of navigation to the Yukone River, where they will outfit for two months in the Casuar. Mr. Clark, who is assistant director of the American Museum, has made several trips procuring specimens for that institution.

"Can you support my daughter in the style to which she is accustomed?" "But I can account for her to the style in which I can support her."

## WORLD HAPPENINGS BRIEFLY TOLD

Emancipation of Turkish women has been made complete with abolition of police powers of censorship over dress. Hereafter women will be able to wear what clothes they like.

An Exchange Telegraph dispatch from Calcutta says 100 persons were drowned in the Maghna River, near Langlaya, by the capsizing of a ferry boat during a storm.

It has been decided not to call a special session of parliament for ratification of the Belgian debt funding agreement reached in Washington, but to postpone the discussion until the parliament re-opens in November.

Lord Bradbury, former representative on the reparations commission and one of the foremost authorities on European finance, declares that France is able to pay about 60 per cent. of her debts to Britain and the United States.

W. Bankes Amery, of the overseas settlement department of the British empire, interviewed on his arrival at Sydney, Australia, said the British Government was prepared to contribute largely toward the assistance of emigrants to Australia.

What cattlemen claim is a world's record price for a bull was paid at the annual cattle show, Buenos Aires. A prize winning Shorthorn bull, named Faithful, brought \$60,000. Faithful's father, when sold some time ago, brought \$44,000.

Miss Weston, a 70-year-old English woman, who has lived in Switzerland for many years, made an Alpine record for women by climbing the north slope of the Wetterhorn. Its ascent is more than twelve thousand feet, which calls for endurance.

Eight hundred thousand motor cars from the United States entered Canada at Niagara Falls during June, July and August. It was estimated. Influx of United States tourists into the Dominion is reported to be 50 per cent. greater than last year, particularly at Windsor, Ont.

Mount Vesuvius has resumed extraordinary activity, the volcano erupting great quantities of ashes and lighting up the whole countryside at night. Authorities at the volcanic observatory, however, have expressed the opinion that no great danger is imminent.

## FOR "Cholera" Infantum" MOTHERS SHOULD USE

This valuable preparation has been on the market for over 80 years, and has no equal for treating the vomiting, purging and diarrhea of cholera infantum.

Get up only by The T. Millbrae Co., Limited, Toronto, Ont.

W. N. U. 1592

## Will Give Double Service

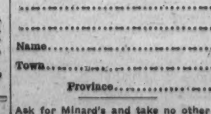

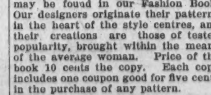

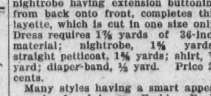

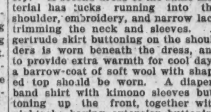

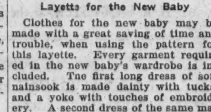

Pacific Cable is To Be Duplicated Next Year

The work of duplicating the Pacific cable from the Fiji Islands to Hamilton, Vancouver Island, will be finished next year, Sir Timothy Goghlan, member of the cable board and former agent-general in London for New South Wales, said on his arrival at Victoria from Australia on the liner Niagara. As the cable section from the Fiji Islands to Australia already has been duplicated, the whole connection next year will be able to give double service, he said. Sir Timothy is on his way to England.

## Heavy Tourist Traffic

Largest Influx of Tourists Ever Seen In Canada

Never before in their history have the National Parks of Canada in the Rocky Mountains had such an influx of tourists, both by rail and automobile, as this present season, according to a bulletin issued by the parks branch of the department of the interior. Last year the number of visitors was twice that of 1929, and this year, from returns already available, it is certain that the 1934 figures will be greatly exceeded.

**1/2 lb Package**

**KRAFT CHEESE**

A handy size package for occasions when half a pound is "just right."

## Canadian Universities

Nearly One in Eighteen of the Total Population Attend College

The total number of students in Canadian universities and colleges in 1934 was 53,639, or nearly one in eighteen of the total population, according to a bulletin issued by the Dominion bureau of statistics. Under the category of colleges, the total number known to have operated in 1934 is 83. Of this total six are agricultural, two technical, two law, one dental, one for pharmacy, one for veterinary science, 28 theological, 39 affiliated, one school for higher commercial studies, one college of art and one military college.

**Muscular Rheumatism Subdued**—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is speedy. There is more virtue in a bottle of it than can be fully estimated.

## Business Conditions Improve

Confidence of U. S. Capital is Shown in the Dominion

Confidence of United States capital in the Dominion, optimistic preparations for the new Canadian financial prospects of a good export, large United States purchasing in Canada, and heavy expenditures of American tourists in the Dominion, were some of the reasons offered by New York financial experts for the constant advance par stand of the Canadian dollar on the New York exchange. The Canadian dollar is now at a premium on the New York exchange.

Protect the child from the ravages of worms by using Mother Gray's Worm Expeller. It is a standard remedy, and years of use have enhanced its reputation.

**Dolls To Santa Land**  
A large shipment of dolls and jigsaw puzzles recently were sent to boys and girls of the most northern settlement of North America. The total 1,000 miles of the journey was by dog sled.

If one is troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

**Birds Fly Low**  
Birds rarely fly more than 1,000 feet from the ground, a German scientist, after making a study from an aeroplane, reports. He also reports that but few birds fly faster than 25 miles an hour.

**FACE WAS DISFIGURED**

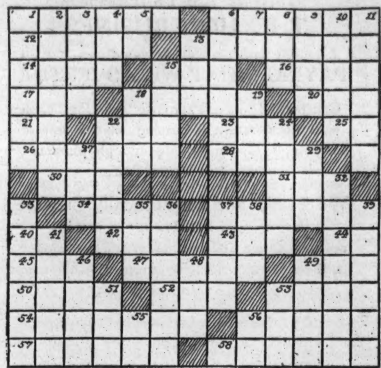

With Pimples. Terribly Itchy. Cuticura Healed.

"My trouble began with blackheads and pimples on my face. The pimples were large, hard and very red, and some of them were wonderful. They were terribly itchy causing me to scratch and the right side of my face was disfigured. The irritation kept me awake, and my face was a sight."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more and before long I saw a wonderful change. I continued the treatment until now I am healed." (Signed) Miss Louise MacDonald, Box 172, Mary St., Newcastle, N. B.

Use Cuticura to clear your skin. Send for Free Sample. Cuticura Soap and Ointment. Write to: Cuticura, P.O. Box 100, Lowell, Mass. U.S.A. Cuticura Shaving Soap, etc.

## OUR CROSSWORD PUZZLE

- |                                 |                                  |   |
|---------------------------------|----------------------------------|---|
| Horizontal                      | Vertical                         | 15—Southern constellations.                             |
| 1—Threw violently.              | 44—Therefore.                    | 19—French coin.   |

|                                 | 13—Outlook.                      |   |

## SUNDAY SCHOOL LESSON

SEPTEMBER 6

PAUL WRITES TO THE PHILIPPIANS

PIANS

Golden Text: I can do all things in him that strengtheneth me. Philippians 4:13.

Lesson: Philippians 1 to 4.

Devotional Reading: Philippians 2:5-11.

The Text Explained and Illumined

Facts of which Saul of Tarsus was proud, versus 5, 6—There were seven points which made Saul of Tarsus feel superior to most Jews. Five of them were these: He had been circumcised of the eighth day, of the stock of Israel, of the tribe of Benjamin, a Hebrew of the Hebrews; as touching the law, a Pharisee.

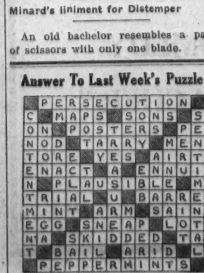

Dr. Osora S. Davis remarks that the items of which a man today would be proud are quite different and he translates Paul's into the corresponding terms of our own time: "I became a member of a Christian church at an early age; my ancestors came to America at the very beginning of the settlement; they were descended from the blood of King England, and I have belonged to a family that has given ministers, teachers and professional men to the service of the country from the beginning, including ancestors in all the great wars that have been fought for freedom in America."

Furthermore, Paul had been zealous in persecuting the church; and had so scrupulously kept the law that he was blameless. These were facts that given him great reputation among his compatriots. In his letter to the Galatians he writes: "Ye have heard of my manner of life in time past in the Jews' religion, how that beyond measure I persecuted the church of God, and made havoc of it; and I advanced in the Jews' religion beyond many of mine own age among my countrymen; being more exceedingly so for the traditions of my fathers."

Minard's liniment for Disemper

An old bachelor resembles a pair of scissors with only one blade.

Answer To Last Week's Puzzle

## The Chinese Point of View

Charge More For Articles Supplied in Large Quantities

The Chinese find it difficult to understand the British point of view as has been evidenced in recent events, and perhaps, illustrated by the experience of a gentleman visiting Canton a short time ago who saw some Mah-Jongg sets being sold at \$5.00 each. He inquired what he would be charged if he ordered 250 sets, and was told \$6.00 each. "You see," was the explanation, "it is so much more trouble to make 250 sets than it is to make one, so we have to charge more!"

## RHEUMATISM

Apply Minard's to the aching spot and get quick relief.

**How Can Man Be His Own  
Grandfather? Answer**

How a man is his own grandfather is explained by Mr. C. J. Liebenberg in this manner: I married a widow with a daughter. My father, who was a widower at the time, frequently visited us. He fell in love with the daughter and eventually married her. My father thus became my son-in-law and my stepdaughter became my mother-in-law.

Shortly afterwards my wife gave birth to a son, who is naturally my father's brother-in-law and at the same time my uncle, for he is the brother of my stepmother. To make matters more involved, my father's wife also became the mother of a son. This boy is my brother and also my grandfather.

My wife is logically my grandmother, for she is my stepmother's mother. I am therefore my wife's husband and grandfather, and since the husband of anyone's grandmother is his grandfather, I have to acknowledge that I am my own grandfather.

**Dirtiest Village in the World  
is in Tibet**

Tibet is famous for many things, but few people know that the dirtiest place in the world is to be found in the land of the Lamas.

It is a village, Phari-jong by name, situate on a piece of rising ground in the centre of a plain not many miles from Mt. Chomolhart, one of the finest mountains in Tibet. It stands over 14,000 feet above sea-level, and is believed to be the highest place in continuous habitation in the world. It was built some 500 years ago.

Phari consists of a fortress, surrounded by 200 hovels. Owing to the fact that everything which we would throw into our dustbin is there simply thrown out, these hovels are now below the ground. Year by year the heaps of rubbish have grown, until the occupants of the "houses" have had to cut paths through them from their front doors to the road.

In spite of its "buried" look, however, Phari is one of the leading "market towns" of Tibet. There is a respectable bungalow in the village, kept up by the Indian Government for the use of its representatives, and it was here that the last Mt. Everest expedition arranged to stop when carrying out their exploration of the nearby mountain. Phari is also in postal and telegraphic communication with India.

**Ankle Lamps For Women**

Are Latest Thing in Paris

The latest fashion for smart Parisian women is an ankle lamp for evening wear.

The lamps were originally introduced for the benefit of women motorists to prevent them stumbling when stepping out of a car—a great advantage particularly to those with weak easily twisted ankles.

Practical Frenchwomen have also discovered that the new lamp is invaluable when the owner wishes to pick her way at night over puddles in the roads and pavements.

The lamps resemble the ankle bracelet introduced recently, and are easily affixed, an opening on one side permitting the lamp to be slipped over the ankle in a second. The bulb is concealed under a visor, which in turn is camouflaged with ribbon or flower buds. The ankle lights are obtainable in various colors.

The light can be flashed on and off at will. An almost invisible wire runs upward, usually terminating in the wearer's handbag or vanity case. A small button on the end is pressed when the light is needed.

*After the fire  
is Out—  
people are always  
thinking about Fire  
Insurance. The time  
for such thoughts is  
before the fire starts.*
